

SAT TEST PREP

SAT® Tutorials are built specifically for the Redesigned SAT (2016) with consideration of SAT's test specifications to provide students a more successful and less stressful preparation effort for key areas of the SAT exam.

SAT Math, Writing and Language, and Reading Tutorials offer targeted instruction, practice, and review. Students engage with the content in an interactive, feedback-rich environment as they progress through SAT test-aligned modules. Students practice skills essential to the test they're preparing for and build the depth of knowledge, confidence, and higher order skills required to demonstrate mastery when put to the test.

College Readiness: Our Approach

In each module, the Learn It and Try It makes complex ideas accessible to students through focused content, guided analysis, and practice with personalized feedback so students are empowered to increase their Exam Readiness. The Review It offers an engaging, high impact video summary of key concepts and important to grasp connections. The Test It assesses a student's mastery of the module's concepts, providing granular performance data to students and teachers, linking a student's performance to SAT content dimension descriptions. To help students focus on the content most relevant to them, unit-level pretests and post tests can quickly identify where students are ready for test day and where they still need to review and practice.

This Tutorial is aligned with Redesigned SAT test specifications for Math and Evidence-Based Reading and Writing tests.
